

Android Mobile App Developer

What is KidoCode?

Learning is a treasure that will follow its owner everywhere at any time! We are young, passionate, and coming from academics environments. We believe that we can change our world into a better place if we can provide valuable and practical education for every one. We love computer programming and we think everyone must learn programming, because it teaches you how to think! So we want to see every single child in this planet knowing how to program a computer! We are teaching children from 4 to 18 years old. It is beautiful, sweet, and energetic! We also train their parents as their teachers! This is not only a business, but a meaningful job, duty, and a great hobby!

At KidoCode we are one unique family, ALL IN ONE, and with one unique goal, let every child knows how to program!

Who is a KidoCode Android App Developer?

Your primary focus will be the development of Android applications and their integration with back-end services. You will be working along-side other developers working on different layers of infrastructure. Therefore, commitment to collaborative problem solving, sophisticated design, and creating quality products is essential.

JOB DESCRIPTION

We are looking for an Android mobile application developer who thinks out of the box and can push the limits at all times! Someone who is passionate as we are about mobile apps for the Android platform and has a seriously good portfolio to prove it! Someone who possesses a passion for pushing mobile technologies to the limits and will work with our team of talented developers to design and build the next generation of our mobile applications.

You will be involved in every step of the development process, from brainstorming product ideas, to pushing apps out of the door. You will also contribute to our existing portfolio of mobile apps and will help maintain these apps to ensure they continue to function flawlessly across new Android releases.

A Recipe for Next Generation

MAIN JOB TASKS AND RESPONSIBILITIES

- Design and build advanced applications for the Android platform
- Collaborate with cross-functional teams to define, design, and ship new features
- Work with outside data sources and API's
- Unit-test code for robustness, including edge cases, usability, and general reliability
- Work on bug fixing and improving application performance
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency
- Experience contributing in an Agile development environment
- Occasional availability for on-call/emergency support
- Ability to work flexible hours when necessary for deadlines and off-hours installations

EDUCATION AND EXPERIENCE

- 3 years of Android Mobile App Development experience
- Have published at least one original Android app
- Strong Objective-C and Java skills and extensive inside-out knowledge of Android SDK
- Experience using and creating scalable web-based RESTful APIs
- Experience with third-party libraries and API's
- Object Oriented PHP skills at all scales
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies
- Solid understanding of the full mobile development life cycle
- Exceptional organizational and project management skills
- Demonstrated success in defining and launching mobile apps

BONUS POINTS:

- You exhibit impressive UI/UX skills
- You also have Python/Django skills
- You like poking around at private Android APIs
- You have created jailbreak apps before

A Recipe for Next Generation

- You are familiar with “hybrid” apps (web views wrapped around a native app)

KEY COMPETENCIES

- Strong analytical and problem-solving skills
- Effective communication skills
- Good interpersonal skills
- Flexibility
- Reliability
- Teamwork
