## Trainer

### What is KidoCode?

Learning is a treasure that will follow its owner everywhere at any time! We are young, passionate, and coming from academics environments! We believe that we can change our world into a better place if we can provide valuable and practical education for every one! We love computer programming and we think everyone must learn programming, because it teaches you how to think! So we want to see every single child in this planet knows how to program a computer! We are teaching children from 7 to 18 years old! It is beautiful, sweet and energetic! We also train their parents as well as their teachers! This is not only a business, but a meaningful job, duty and a great hobby! At KidoCode we are one unique family, ALL IN ONE, and with one unique goal, let every child knows how to program!

### Who is a KidoCode Trainer?

You will work as a computer teacher and coding trainer for kids and youth. You will help the kids to improve their Team Working and Problem Solving skills. Only the kids? Of course No! You will train their parents and even their teachers in educational centers to know more about computer and coding to understand and help the children. In an interactive and innovative environment, you will help the kids to learn computer science, math, and personal skills. To make short a long story, you will be a trainer of KidoCode!

### JOB DESCRIPTION

A career as a KidoCode trainer offers many different opportunities. It cover basic keyboarding and computer functions for teenagers or their parent and teachers, updating their knowledge about our trainings. Also, you may teach more complicated elements of computer science to the youth. KidoCode's trainer duties include creating lesson plans, evaluating student performance, maintaining classroom records, meeting with parents, teachers and other professionals, updating curriculum, and participating in campus events. Additional research, supervisory or organizational duties may also be required depending upon the expectation of the employing school.
